

**Note:** Potential study issues listed below are from the 2008 Master Study Resolution.

## **Public Utilities and Technology**

165. **211 System** - to study statewide implementation of the 211 phone system for citizen access to government information and the dissemination of information to citizens during emergencies. (Hutchings)

166. **Alternative Energy** - to study the alternative energy issues identified in S.B. 169. (Stowell)

168. **Energy Efficiency** - to study electricity demand reductions and energy efficiency incentives. (McCoy)

169. **Energy Incentives** - to study solar energy development incentives. (McCoy)

170. **Merging Informational Numbers** - to study the merging of \*11 and 511 informational, non-emergency numbers. (Niederhauser)

171. **Power Generation Sources** - to study and identify, map and maintain in the State Geographic Information Database the areas in the state with economically feasible electrical power generation from renewable, traditional, and other sources, and research the cost of developing power generation from each source (S.B. 169). (Barrus)

172. **Sewage Treatment Systems** - to study types of on-site sewage treatment systems, and whether to allow a few demonstration projects utilizing biosystems in residential settings. (Wiley)

173. **State Trademarks in E-Commerce** - to study the legitimate use of state trademarks in e-commerce. (Urquhart)

174. **Underground Sewage Facilities** - to study methods of locating underground sewage facilities, who should locate them, and whether existing or only new facilities should be located (1st Sub. S.B. 127). (Jenkins; Greiner submitted general "S.B. 127" request)

175. **Utilities in Mobile Home Parks** - to study providing utility services to mobile home park residents, and determining responsibility for improvements (H.B. 335). (Holdaway)

**Other potential study issues you believe the committee should review:**
